Recently Adopted Accounting Standard

As disclosed in Safety’s Annual Report on Form 10-K for the year ended December 31, 2017, accounting guidance for financial instruments changed in 2018 under ASU 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. We adopted this accounting standard update, effective January 1, 2018, using a cumulative-effect adjustment. This adjustment moved the historical unrealized gains and losses, net of tax, on the equity portfolio from accumulated other comprehensive earnings to retained earnings, but had no impact on overall shareholders’ equity. In addition, for 2018 and forward, the change in fair value for equity securities is required to be recognized through net income rather than through other comprehensive income. As defined below, we exclude these unrealized gains and losses in arriving at non-GAAP operating income and non-GAAP operating income per diluted share. For the quarter ended June 30, 2018, a decrease of $2.7 million for the change in unrealized gains was recognized within income before income taxes and the income tax expense was reduced by $0.6 million. For the six months ended June 30, 2018, a decrease of $6.2 million for the change in unrealized gains was recognized within income before income taxes and the income tax expense was reduced by $1.3 million.

Non-GAAP Measures

Management has included certain non-GAAP financial measures in presenting the Company’s results. Management believes that these non-GAAP measures better explain the Company’s results of operations and allow for a more complete understanding of the underlying trends in the Company’s business. These measures should not be viewed as a substitute for those determined in accordance with generally accepted accounting principles (“GAAP”). In addition, our definitions of these items may not be comparable to the definitions used by other companies.

Non-GAAP operating income and operating income per diluted share consist of our GAAP net income adjusted by the net realized gains (losses), net impairment losses on investments, change in net unrealized gains (losses) on equity securities and taxes related thereto. The adjustment for net unrealized losses on equity securities is only applicable for 2018 due to the adoption of the above mentioned accounting standard update. Net income and earnings per diluted share are the GAAP financial measures that are most directly comparable to operating income and operating income per diluted share, respectively. A reconciliation of the GAAP financial measures to these non-GAAP measures is included in the 2018 financial highlights below.

**Cautionary Statement under "Safe Harbor" Provision of the Private Securities Litigation Reform Act of 1995:**

This press release contains, and Safety may from time to time make, written or oral "forward-looking statements" within the meaning of the U.S. federal securities laws. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as "believe," "expect," "anticipate," "intend," "plan," "estimate," "aim," "projects," or words of similar meaning and expressions that indicate future events and trends, or future or conditional verbs such as "will," "would," "should," "could," or "may". All statements that address expectations or projections about the future, including statements about the Company’s strategy for growth, product development, market position, expenditures and financial results, are forward-looking statements.

Forward-looking statements are not guarantees of future performance. By their nature, forward-looking statements are subject to risks and uncertainties. There are a number of factors, many of which are beyond our control, that could cause actual future conditions, events, results or trends to differ significantly and/or materially from historical results or those projected in the forward-looking statements. These factors include but are not limited to the competitive nature of our industry and the possible adverse effects of such competition. Although a number of national insurers that are much larger than we are do not currently compete in a material way in the Massachusetts private passenger automobile market, if one or more of these companies decided to aggressively enter the market it could have a material adverse effect on us. Other significant factors include conditions for business operations and restrictive regulations in Massachusetts, the possibility of losses due to claims resulting from severe weather, the possibility that the Commissioner of Insurance may approve future Rule changes that change the operation of the residual market, our possible need for and availability of additional financing, and our dependence on strategic relationships, among others, and other risks and factors identified from time to time in our reports filed with the SEC, such as those set forth under the caption "Risk Factors" in our Form 10-K for the year ended December 31, 2017 filed with the SEC on February 28, 2018.

We are not under any obligation (and expressly disclaim any such obligation) to update or alter our forward-looking statements, whether as a result of new information, future events, or otherwise. You should carefully consider the possibility that actual results may differ materially from our forward-looking statements.
